

NIDA AFRIDI

Business Analyst

+91-8209330700 | afridinida17@gmail.com | [linkedin.com/in/nida-afриди-088181371](https://www.linkedin.com/in/nida-afриди-088181371) | Bhubaneswar, India

PROFESSIONAL SUMMARY

Business Analyst with hands-on experience in requirements gathering, process mapping, and translating stakeholder needs into structured documentation (BRD, FRD, SRS, UML, wireframes) across Agile/SDLC workflows. Skilled in data analysis and visualization using Python, SQL, and Power BI, with a track record of converting raw data and business requirements into actionable insights and clear functional specifications. Recently completed a KPMG-designed advisory simulation covering client operations review, practice research, and stakeholder-ready summary presentations. Strong stakeholder communication, sprint-based delivery experience, and a CGPA-backed technical foundation in Computer Science & Communication Engineering. Seeking a Business Analyst role to drive data-informed, requirement-driven decision-making.

EDUCATION

B.Tech – Computer Science & Communication Engineering, KIIT University, Bhubaneswar 2026

CGPA: 7.01

CORE COMPETENCIES & SKILLS

Business Analysis & Documentation: BRD, FRD, SRS, requirements gathering & elicitation, process mapping, UML diagrams, wireframing, gap analysis, use-case documentation, SDLC, Agile/sprint workflows

Data Analysis & Visualization: Python (Pandas, NumPy, Matplotlib, Seaborn), Power BI, Excel

Database & Querying: MySQL, SQL Server — complex queries, joins, aggregations

Programming Languages: Python, SQL, C, HTML, CSS

Tools & Environments: Jupyter Notebook, VS Code, Anaconda, Power BI, Notion, Google Docs, Git

AI / ML Exposure: Stable Diffusion, CLIP, VAE, U-Net, OpenCV, Speech & Facial Analysis

Soft Skills: Analytical thinking, stakeholder communication, teamwork, leadership

PROFESSIONAL EXPERIENCE

Web Development Intern — Tyzzle Media.in

2025

Shopify eCommerce Project – Nayeem Perfumes

- Led requirements gathering and elicitation with the client, documenting business needs into structured BRDs and translating them into actionable development tasks via sprint-based workflows (Notion, Google Docs).
- Performed gap analysis on cross-device user behaviour using Chrome DevTools to identify UX issues; specified and implemented responsive CSS fixes improving mobile compatibility.
- Authored functional documentation, handover notes, test cases, and maintenance guidelines, enabling smooth knowledge transfer between business and development teams.
- Collaborated with developers, designers, and operations teams to align technical deliverables with business objectives, acting as the link between stakeholders and the build team.

PROJECTS

Interview Lense — AI-Powered Interview Analysis System

Aug 2025 – Present

Python, OpenCV, Computer Vision, Speech Processing, Analytics Dashboard

- Defined functional requirements and scoring logic for a performance analytics dashboard, generating structured, data-driven feedback reports for recruiters from raw behavioural signals.
- Specified and implemented facial expression & micro-expression analysis (OpenCV) to score candidate confidence levels, providing measurable, repeatable assessments.
- Documented multi-dimensional scoring requirements integrating speech pattern analysis (tone variation, pause frequency, verbal fluency) into candidate scorecards.
- Mapped end-to-end data pipeline process flow: data capture → feature extraction → scoring model → report generation — demonstrating SDLC and process documentation thinking.

Text-to-Image Generator — Stable Diffusion Pipeline

Jan 2025 – Apr 2025

Stable Diffusion, LDM, CLIP, VAE, U-Net, PyTorch

- Built and documented a complete ML pipeline from prompt ingestion to image output, covering data preprocessing, model configuration, and output evaluation — skills transferable to BI and requirements documentation workflows.
- Applied CLIP embeddings to measure semantic alignment between inputs and outputs, demonstrating quantitative model evaluation methodology.
- Optimised computational load via Latent Diffusion Models — analogous to query and dashboard optimisation in analytics contexts.

Nayeem Perfumes — Shopify eCommerce Website

May 2025 – Jul 2025

Liquid, HTML, CSS, JavaScript, Git, Chrome DevTools

- Designed information architecture and wireframes informed by user journey analysis, ensuring data-backed UX decisions.
- Validated design changes using DevTools performance metrics, applying an iterative test-measure-improve cycle.

CERTIFICATIONS

- KPMG (via Forage) — Career Catalyst: Advisory — Introduction to KPMG Advisory, Understanding the Client's Operations & Reviewing Data, Leading Practice Research, Preparing a Summary Presentation, Initiative Brainstorming (June 2026)
- Coursera: High Performance Collaboration — Leadership, Teamwork, and Negotiation
- Coursera: Leading Teams: Developing as a Leader
- Coursera: Business for Good: Fundamentals of Corporate Responsibility

POSITIONS OF RESPONSIBILITY & ACHIEVEMENTS

- Graphic Designer – Krhythm, KIIT (Aug 2024 – Present)
- Broadcasting Lead – Kraya Kuber, KIIT (Aug 2023 – Present): led broadcasting for KRITARTH, CHIMERA, KHETSHEN, UDGHOSH
- Central Organising Committee Member – KIITFest 8.0 & 7.0, KIIT (Feb 2025 & Feb 2024)
- Video Editor – Khwaab, KIIT (Aug 2023 – Present)
- 1st Place – Qutopia Launchpad XXIV; 2nd Place – Qutopia Launchpad XXIII, KIIT University
- House Captain – Led inter-school competitions and organised student activities
